

Model Performance Evaluation Report

This report evaluates multiple machine learning models and a rule-based SCRDR model on a mindfulness dataset.

Model	Accuracy
Decision Tree	0.92
Random Forest	0.92
Logistic Regression	0.92
SVM	0.75
Naive Bayes	0.62
SCRDR	0.71

Machine learning models achieved higher accuracy, while SCRDR provided better interpretability. A hybrid approach may yield the best results.
